

SALIM TURDALIEV

SENIOR STATISTICIAN | RANDOMIZED TRIALS | CAUSAL INFERENCE | STATISTICAL LEADERSHIP

Residency: Prague, Czech Republic | Citizenship: Uzbekistan | email: salimturdaliev@gmail.com | website: salimturdaliev.github.io

PROFESSIONAL PROFILE

PhD-trained quantitative researcher and statistical project lead with 10+ years of experience delivering randomized controlled trials, natural experiments, longitudinal studies and EU policy evaluations. Leads statistical work from study design, stratified randomization and vendor coordination through analysis-ready data construction, advanced modeling, validation, quality control of deliverables, interpretation and publication. Author of multiple randomized and quasi-experimental studies published in peer-reviewed academic journals, with applications in energy, environmental policy, education and household welfare. Experienced in communicating statistical strategy to multidisciplinary teams and in teaching statistics and econometrics at undergraduate and graduate levels. Advanced user of R, Python, Stata and Excel, with trial-design and causal-inference expertise.

CORE STATISTICAL EXPERTISE

RCT design and intent-to-treat analysis | Stratified randomization | Longitudinal and panel data | Phase-specific treatment effects | Heterogeneous treatment effects | Bootstrap and robust inference | Natural experiments and instrumental variables | Data cleaning, integration and validation | Missingness, outlier and balance checks | Analysis specifications | Quality control of statistical tables and figures | Reproducible programming | Client, team and vendor communication | Technical presentations and statistical training

RELEVANT PROFESSIONAL EXPERIENCE

PRAGUE UNIVERSITY OF ECONOMICS AND BUSINESS (VŠE)

Nov 2025-Present

Research Fellow / Principal Investigator and Study Lead

- Developed a three-year Czech Science Foundation research program (CZK 4.231 million), for an experimental economics research, translating the research question into harmonized laboratory experiments and field randomized controlled trials for 1,175 participants, with defined milestones, data governance, ethics and GDPR safeguards, quality controls and outputs.
- Designed the governance and review model for four investigators, a doctoral research assistant and an external fieldwork agency; assigned responsibilities across study design, programming, recruitment, implementation, data review, statistical analysis and reporting.
- Lead statistical research from planning to publication by setting analysis priorities, coordinating data and modeling tasks, tracking dependencies and integrating team inputs into quality-controlled outputs.

RPA PRAGUE | Economist - Project Delivery and Analytics

Dec 2023-Aug 2026

- Contributed to quantitative workstreams for European Commission directorates and EU agencies, turning research requirements into data tasks, analytical specifications, schedules, review points and client-ready statistical deliverables.
- Construct and validate datasets; perform statistical and econometric modeling in R, Python, Stata and Excel; run robustness checks; and review tables, figures, technical narratives and executive findings for accuracy and consistency.
- Communicate data issues, methods and results across multidisciplinary teams, clients and research contributors; co-authored the European Commission's 2024 Prospective Study on the Future of the Postal Sector Report.

CHARLES UNIVERSITY | RCT Project Lead, Researcher and Graduate Instructor

2019-2025

Three-arm randomized controlled trial | Yerevan, Armenia | 291 households | 5,534 household-month observations | 20 months

- Led end-to-end delivery of a longitudinal randomized field trial, coordinating the external research vendor, recruitment and screening, repeated data collection, data-quality follow-up and resolution of operational issues across control and two treatment arms.
- Led the design and implementation of stratified randomization based on baseline consumption, heating type and dwelling size; assessed treatment-arm balance and maintained the original allocation through baseline, active-treatment, pause and reintroduction phases.
- Led statistical analysis of intent-to-treat effects, phase and season interactions, household heterogeneity and longitudinal outcomes, with documented missing-data and outlier rules plus bootstrap-based robust inference.
- Published the RCT results as first author in Environmental and Resource Economics (2026), a leading peer-reviewed field journal, and translated complex findings into conference presentations and policy-relevant conclusions.

CHARLES UNIVERSITY (continued) | Principal Investigator | 2020-2022

GA UK 454120 | Natural-experiment portfolio | CZK 865,000

- As Principal Investigator, led a research program on nonlinear pricing, energy demand, technology adoption and emissions, overseeing study planning, budgeting, external data collection, team coordination, project milestones and statistical analysis.
- Applied household panel models, instrumental-variable strategies, policy counterfactuals and heterogeneous-effect analyses; led data validation, robustness assessment, interpretation and reporting through peer-reviewed publication.
- Project was recognized as the best 2023 GA UK project at the Faculty of Social Sciences, Charles University; the research portfolio generated four peer-reviewed academic journal publications.

DE FACTO MARKETING | Project Manager and Data Analyst

2010-2014

- Managed quantitative survey and focus-group projects from client brief and questionnaire design through vendor coordination, fieldwork quality control, data analysis and final presentation of decision-ready findings.

STATISTICS, ECONOMICS AND ECONOMETRICS TEACHING

Lecturer - CIEE, Charles University: Economics of the European Union (undergraduate), Sep 2023-Jun 2025.

Graduate Instructor - Institute of Economic Studies, Charles University: Applied Microeconometrics (2021-2023); Econometrics II (2022); Environmental Economics (2021); International Political Economy (2021-2022).

Associate Lecturer - Westminster International University in Tashkent: Topics in Microeconomics (2019); Statistics (2018-2019); Econometrics (2017-2018).

Lecturer - Management Development Institute of Singapore in Tashkent: Foundations of Mathematics (2017-2018).

EDUCATION

PhD, Economics: Institute of Economic Studies, Charles University, Prague | 2025

MA, Economics: CERGE-EI, Charles University, Prague | 2017

BSc, Economics with Finance: First Class Honours, Westminster International University in Tashkent | 2014

PROGRAMMING, REPORTING AND LANGUAGES

Programming and analytics: R, Python, Stata, Microsoft Excel; reusable analysis scripts; longitudinal dataset construction; statistical modeling; diagnostics; visualization.

Quality and communication: Analysis specifications; reproducible workflows; data and output validation; review of statistical tables and figures; technical reports; presentations; client and vendor coordination.

Languages: English (fluent); Russian (native); Uzbek (native).
